Process the batch of records by updating the records as Review and Batch status as Reviewed

```
                          File loaded and
                          batch is created
                                │
                                ▼
                        Batch status will be
                        in Open and Batch
                        Review Status will
                        be Not Reviewed
                                │
                                ▼
                        User clicks on the
                        batch for review and
                        edit
```

- User does nothing
- User reviews few or more records and saves the batch
- User makes some edit but does not review the records within the batch
- User reviews all the records within the batch

Records flagged as reviewed are found

Is batch status Reviewed by the user?

NO — Do not enable Queue Button

YES — Enable Queue Update button

YES — Is there any records flagged as reviewed?

YES & NO — Show the batch in the History tab

- Batch status will be in Pending Review and batch review status will be in Reviewed
- Batch will not be seen in the Open batches grid
